

Walk-On Time at 55° F and Lower

2-pack epoxy vs. aliphatic polyurethane vs. One Day Floors™ polyaspartic

Applied at 55° F and lower, One Day Floors™ polyaspartic coatings can be walked on in just 2 hours—34 hours sooner than aliphatic polyurethanes coatings and days sooner than 2-pack epoxy coatings. In most cases, 2-pack epoxy coatings are not recommended for applications below 55° F.
